

AN HF SINCLAIR BRAND

Specialty Base Oils & Fluids

Start Pure. Finish Strong.

SUPERIOR PERFORMANCE STARTS WITH PURITY

Petro-Canada Lubricants produces specialty base oils, process oils, white oils and drilling mud base fluids that are among the purest in the world. For every application, in every type of equipment and in a wide variety of industries, products made from our specialty fluids make a measurable difference in the end, because they're pure from the start.

A BETTER BASE FOR YOUR BUSINESS TO BUILD ON

Not all base oils and fluids are created equal. As a pioneer in the manufacturing of Group II and Group III base oils, we apply more than 30 years of experience in choosing the right catalyst and selecting high-quality feedstock. We use a severe hydrotreating and hydrocracking process to remove impurities that can hinder performance to provide you with superior base oils and specialty fluids:

- Clear, colorless, odorless
- Virtually non-toxic
- Highly saturated isoparaffin content
- High viscosity index
- Excellent low-temperature properties
- Good oxidative resistance and thermal stability
- Good demulsibility
- Good biodegradability characteristics

**We invite you to put our purity to the test.

A MORE REFINED APPROACH

HT SEVERE HYDROCRACKING PROCESS (GROUP II)

In the HT severe hydrocracking process, Petro-Canada Lubricants eliminates aromatics and polar compounds by reacting the feedstock with hydrogen, in the presence of a catalyst, at high temperatures and pressures. The hydrocarbon molecules that are formed are very stable, which makes them ideal for use as lubricant base oils.

HT SEVERE HYDROCRACKING / HYDROISOMERIZATION (GROUP II, II+, III)

Our second production unit uses the HT severe hydrocracking process, but replaces conventional dewaxing with hydroisomerization. Using a sophisticated catalyst, we selectively isomerize the wax to a high VI, low-pour, isoparaffinic fluid that provides end-performance characteristics very similar to lubricants based on polyalphaolefins (PAOs).

PURITY™ BASE OILS

THE CLEAR CHOICE FROM START TO FINISH

PURITY base oils are ideal for all your blending specifications and needs. Their high-purity, high-VI and low-volatility properties contribute to higher fuel efficiency in engine oils and reduced power consumption in industrial lubricants. A full range of PURITY base oils is readily available to help you optimize cost and/or performance in a wide range of automotive, industrial and specialty lubricants.

PURITY GROUP II & GROUP II+ BASE OILS

Achieve synthetic blend performance while reducing dependence on high-cost PAOs. PURITY base oils are excellent blending stocks that can help you meet rigorous industry specifications and are ideal for use in blending and compounding within various lubricant applications.

- Very capable of meeting current conventional specifications
- Group II+ excels as an adjustment stock to optimize cost and performance
- Good response to additives

PURITY GROUP III VHVI SPECIALTY BASE FLUIDS

Our high-quality Group III base oils are an excellent alternative to more expensive PAOs and Group III+ base oils. They allow you to consistently blend and compound formulations meeting increasingly technical demands of synthetic motor oils and high-performance industrial and specialty lubricants.

- Well-positioned to meet needs of ultra-low viscosity grades such as 0W-16
- Outstanding low volatility that allows formulating to severe engine oil specifications
- Excellent response to additives

PURETOL™ WHITE MINERAL OILS & KRYSTOL™ TECHNICAL WHITE MINERAL OILS

PURITY YOU CAN COUNT ON

Petro-Canada Lubricants is one of the largest white mineral oil manufacturers in North America. Our highly refined, colorless and odorless white mineral oils meet the rigorous standards of a wide range of industries and applications.

PURETOL WHITE MINERAL OIL

With a comprehensive range of viscosity grades, PURETOL™ white mineral oils are perfectly suited to meet the needs of formulations for personal care products, cosmetics and food processing applications. Our credentials include:

- European Pharmacopoeia (Ph. Eur.) requirements
- United States Pharmacopeia (USP) mineral oil and National Formulary (NF) light mineral oil grades
- Meet FDA 21 CFR 172.878 and FDA 21 CFR 178.3620(a) requirements for direct and indirect food contact
- Select PURETOL grades are NSF International HX-1 registered for blending high-performance food grade lubricants
- In addition to NSF HX-1 registration, select PURETOL grades are NSF 3H registered for use as a direct food contact release agent
- Kosher Pareve and Halal

KRYSTOL™ TECHNICAL WHITE MINERAL OILS

Our grades of KRYSTOL technical white mineral oils are ideally suited to a wide variety of industries, including plastics, chemicals and adhesives. Our credentials include:

- FDA 21 CFR 178.3620(b) for indirect food contact
- Kosher Pareve and Halal

OTHER HIGH-VALUE SPECIALTY FLUIDS

PARAFLEX™ HT PROCESS OILS

THE MAIN INGREDIENT

Crystal clear, virtually non-toxic PARAFLEX HT process oils are essentially composed of saturated hydrocarbons with virtually no undesirable polar compounds or impurities. With carefully controlled hydrocarbon contents, PARAFLEX process oils are ideal for use as a raw material or ingredient in a wide range of industrial products, including rubber and plastics, leather, adhesives, polishes, plate glass and glass wool.

PARAFLEX OFFERS:

- Good thermal stability
- Low carbon residues
- Superior separation from water
- Low aromatic levels

PUREDRILL™ DRILLING MUD BASE FLUIDS

THE PURE ADVANTAGE

Specially designed to increase drilling productivity while providing protection in environmentally sensitive areas, PUREDRILL is ideal for both on- and offshore drilling operations. Unlike distillate and diesel fluids, PUREDRILL is extremely inert toward elastomer components typically used in petroleum and hydrocarbon processing. That means greater protection against downtime caused by equipment failure. And because PUREDRILL is virtually non-toxic and biodegradable, it helps maximize drilling efficiency while improving rig worker health and safety and minimizing environmental impacts.

PUREDRILL OFFERS:

- Increased lubricity and hole stability
- Enhanced rates of penetration
- Excellent low-temperature fluidity
- Reduced risk, faster and safer cleanup
- Helps eliminate skin and eye irritation

FINISHED LUBRICANTS

Using ultra pure basestocks as a foundation, Petro-Canada Lubricants blends and packages more than 350 different lubricants, specialty fluids and greases. Exporting to over 80 countries on six continents, Petro-Canada Lubricants specializes in offering customers products and services proven to maximize equipment performance, productivity and overall savings. From heavy-duty engine oils to hydraulic fluids and automatic transmission fluids to gear oils and greases, Petro-Canada Lubricants is a one-stop solution to a world of needs.

CONTINUOUS QUALITY

PETRO-CANADA LUBRICANTS' SPECIALTY
BASE OILS & FLUIDS ARE SOLD IN OVER
40 COUNTRIES AROUND THE WORLD

Our commitment to quality drives everything we do.

We meet or exceed the demanding criteria of every industry we serve.

We were the first lubricants manufacturer in North America certified ISO 9001 and first in the world certified to the international automotive standard TS 16949.

We adhere to the globally recognized ISO 14001 standard as a demonstration of commitment to the environment.

RELIABLE SUPPLY

Petro-Canada Lubricants operates the first Group III refinery and produces the widest range of base oils in North America. We're also one of the largest white oil producers in North America, with dedicated infrastructure and distribution processes that preserve product purity from start to finish. Today our products are performing for many of the world's leading companies, in virtually every industry and in over 80 countries around the globe. With our strategically designed distribution network, we are able to offer reliable bulk shipments through rail, truck or marine in order to meet your needs.

VALUABLE PARTNERSHIPS

We believe more is possible when we share and collaborate with our customers. We conduct a comprehensive analysis of your needs and identify areas where we can add value or help reduce operating costs. With world-class research and development, the experience and foresight of a dedicated technical services team, and the most knowledgeable salespeople, we provide unparalleled access to industry expertise that can help make your business more efficient.
